

Avagio Security Awareness Training

Fewer cybersecurity incidents, ongoing defence, regulatory compliance

AVAGIO
Worry-Free IT

Overview

Today's cybercriminals target users to infiltrate your network. They are experts at using phishing, watering hole, and other social engineering attacks to trick end users and abuse their trust.

Your users are your first line of defence. Unfortunately, they can also be the weakest cybersecurity link. As the number of attack strategies that take advantage of them grows, addressing security awareness weak points is now crucial to reduce the impact of malware, ransomware, and other compromises.

Avagio Security Awareness Training offers comprehensive cybersecurity for your end users. Training consists of courses and campaigns that minimise user-generated risks and help reduce infection rates thereby lowering your overall risk to debilitating downtime or data breaches.

Key Features

A fully featured phishing simulator

Phishing is the primary way users are currently socially engineered. Our ever-expanding, relevant template library allows you to engage end users with real-world phishing scenarios. By being able to launch realistic phishing attack simulations, you can monitor user response and direct appropriate awareness programs to users accordingly.

Engaging and interactive training courses

We will send courses directly to end users, who can launch them in one click from their computer or mobile device. Offering engaging, easily consumable interactive courses increases end users' attentiveness and the overall effectiveness of education programs.

Trackable, customizable training campaigns

We will generate comprehensive reports. Measuring success generically and at an individual level is key so you can direct relevant awareness training of different levels and types to users who need them.

Courses

Featured cybersecurity courses:

- » Understanding Cybersecurity
- » Understanding Malware
- » Working Safely and Securely
- » Avoid Phishers, Hackers and Social Engineers

Topical cybersecurity courses:

- » Social Media Awareness
- » Phishing Awareness
- » Websites and Software
- » Email
- » Passwords
- » Physical Access

Compliance courses:

- » PCI DSS
- » Data Protection (UK/EU)
- » GDPR - Global Data Protection Regulation (UK/EU) » HIPAA for CE or BA
